

Yardage Estimator

The following table shows estimated yardage needed according to your gauge. Yardage shown is for an average long-sleeved pullover or cardigan according to chest measurements, allowing for a 2" wearing ease in the finished garment (i.e. finished garment chest would be chest measurement + 2").

For short-sleeved sweaters, reduce yardage by about 20%, and for sleeveless sweaters and children's garments, reduce it by about 30%. Add 10% to 20% for textured & multi-colored patterns. *Side note: To convert meters to yards, multiply by 1.1.*
